

4th European Summit on the Future Internet

13-14 June - Aveiro, Portugal

Rui L. Aguiar received a Ph.D. degree in electrical engineering in 2001 from the University of Aveiro, Portugal. He is currently a professor at the University of Aveiro, being responsible for networking aspects, and is the Director of MAP-Tele, an international program on telecommunications supported by several Portuguese universities. He is leading a research team at the Institute of Telecommunications, Aveiro, on future generation network architectures and systems. His participation in European cooperative research is extensive, and has been invited speaker on future

Internet and mobile architectures in several international fora. He is a member of ACM and a senior member of IEEE, and has been involved in several advisory boards on future networking research. He has more than 300 published papers in those areas, as well as several standard contributions and patents. He has served as technical and general chair of several conferences, such as ICNS'05, ICT'06, ISCC'07, Monami'2012.
